Interview Agenda

Thank You for Your Interest in the Software Engineer Position at Dev.Pro.

We want our interview to be effective, productive and comfortable for you. That's why we would like to help you get a better understanding and tips about our interview process and plan for your interview.

General

The interview will last 1,5-2 hours in general (1 or 2 meetings).

During the interview we will present the project and answer your questions about technologies, implementations, processes, role responsibilities, and other details which are not under NDA.

After that we'll talk about your working experience, technologies you use, your role, achievements, etc.

Technical

The level and quantity of questions may vary depending on your level, but these tips will help you to be better prepared for the interview and make the prospect of it a little bit clearer.

Please note: we don't require you to know all the listed topics like the back of your hand, and we understand that this is a quite long list.

Programming Languages

language-specific data types and operators, collections, libraries, memory management, etc. It is preferable to be familiar with languages like JavaScript, Python, C#, and Java

Web

web architecture at a high level, such as DNS, Load Balancers, Web Application Servers, CDN, Caching Services, Job Queue, Cloud storage, etc.

Requirements

you may be asked about your experience in requirements management. It includes both functional and non-functional requirements

Coding

during the interview, we will ask you to write some code

Database

differences between No SQL and SQL databases, a great advantage will be knowledge of at least one of data types, built-in functions, aggregations, combinations, etc.

Data Structures & Algorithms

performance and complexity of written code, data structures, when to apply them, and their internal representation

DevOps

CI/CD, containerization tools and virtualization technologies, Unix operating systems, Cloud platforms (AWS/Google/Azure/etc.), etc.

Project Maintenance

in this section we will discuss how to identify and process technical debt and technical risks

After the interview, we will send you a quick survey and appreciate your feedback and ideas so we can keep improving our interview processes.

Thanks again for your interest in cooperating with Dev.Pro! We're looking forward to speaking with you.
